#### Specifications

<b>Work Load Capacity</b>	1,000 lb
<b>Maximum Blast Envelope Capacity</b>	36 in Dia. x 19 in
<b>Optimal Blast Envelope Capacity</b>	24 in Dia. x 12 in
<b>Media Charge Capacity (Steel)</b>	300 lb
<b>Table Blaster Height, Cabinet Only</b>	122 in
<b>Table Blaster Width, Cabinet Only</b>	69 in
<b>Table Blaster Depth, Cabinet Only</b>	64 in
<b>Dust Collector Height</b>	83 in
<b>Dust Collector Width</b>	40 in
<b>Dust Collector Depth</b>	26 in
<b>Direct-Drive Blast Wheel</b>	7.5 hp

**Direct-Drive Blast Wheel - Optional Wheels** (2) 5 hp

**Ventilation Requirement** 800 CFM

**Electrical Requirement - Current (Table Blaster Only)** 11.7 A

**Electrical Requirement - Current (with Dust Collector)** 15.5 A

**Electrical Requirement - Voltage** 460 V

**Electrical Requirement - Frequency** 60 Hz

**Electrical Requirement - Phase** 3

## Capabilities

### Features

- Solid construction
- Safety Interlock
- 7.5 HP direct drive blast wheel
- 36" x 12" Optimal Blast Area
- 1000 # Table Capacity
- Ease of operation
- Low noise level
- Low initial investment
- Superior parts cleaning
- Air wash separator
- Dial cycle timer

### Blast Cleaning Solutions for:

- Ferrous and non-ferrous castings
- Heat treated parts
- Automotive parts
- Die Castings
- Deflashing plastic
- Descaling
- Peening
- Deburring

### Available Options

- Variable speed motors
- Rotary Screen
- Dust collector
