Specifications | Capabilities

Specifications

Work Load Capacity	1,000 lb
Maximum Blast Envelope Capacity	36 in Dia. x 29 in
Optimal Blast Envelope Capacity	24 in Dia. x 20 in
Media Charge Capacity (Steel)	200 lb
Table Blaster Height, Cabinet Only	120 in
Table Blaster Width, Cabinet Only	96 in
Table Blaster Depth, Cabinet Only	65 in
Dust Collector	Mounted on cabinet
Direct-Drive Blast Wheel	5 hp, oscillating
Ventilation Requirement	600 CFM

Electrical Requirement - Current (Table Blaster Only) 8.8 A

Electrical Requirement - Current (with Dust Collector) 9.6 A

Electrical Requirement - Voltage 460 V

Electrical Requirement - Frequency 60 Hz

Electrical Requirement - Phase 3

Capabilities

Features

- Solid construction
- Safety Interlock
- 5 HP direct drive blast wheel
- Oscillation
- 36" x 29" Optimal Blast Area
- 1000 # Table Capacity
- Ease of operation
- Low noise level
- Low initial investment
- Superior parts cleaning
- Air wash separator
- Dust collector
- Digital cycle timer

Blast Cleaning Solutions for:

- Ferrous and non-ferrous castings
- Heat treated parts
- Automotive parts
- Die Castings
- Deflashing plastic
- Descaling
- Peening
- Deburring

Available Options

- Variable speed motors
- Rotary Screen
