#### Specifications

<b>Work Load Capacity</b>	5,000 lb
<b>Maximum Blast Envelope Capacity</b>	48 in Dia. x 28 in
<b>Optimal Blast Envelope Capacity</b>	36 in Dia. x 20 in
<b>Media Charge Capacity (Steel)</b>	800 lb
<b>Table Blaster Height, Cabinet Only</b>	108 in
<b>Table Blaster Width, Cabinet Only</b>	95 in
<b>Table Blaster Depth, Cabinet Only</b>	71 in
<b>Dust Collector Height</b>	92 in
<b>Dust Collector Width</b>	32 in
<b>Dust Collector Depth</b>	38 in
<b>Direct-Drive Blast Wheel</b>	15 hp

**Direct-Drive Blast Wheel - Optional Wheels** (2) 7.5 hp

**Ventilation Requirement** 1,000 CFM

**Electrical Requirement - Current (Table Blaster Only)** 20.8 A

**Electrical Requirement - Current (with Dust Collector)** 24.6 A

**Electrical Requirement - Voltage** 460 V

**Electrical Requirement - Frequency** 60 Hz

**Electrical Requirement - Phase** 3

## Capabilities

### Features

- Solid construction
- Safety Interlock
- 15 HP direct drive blast wheel
- 48" x 28" Optimal Blast Area
- 5000 # Table Capacity
- Ease of operation
- Low noise level
- Low initial investment
- Superior parts cleaning
- Air wash separator
- Dial cycle timer

### Blast Cleaning Solutions for:

- Ferrous and non-ferrous castings
- Heat treated parts
- Automotive parts
- Die Castings
- Deflashing plastic
- Descaling
- Peening
- Deburring

### Available Options

- Variable speed motors
- Rotary Screen
- Dust collector
