### Specifications

<b>Work Load Capacity</b>	6,000 lb
<b>Maximum Blast Envelope Capacity</b>	84 in Dia. x 37 in
<b>Optimal Blast Envelope Capacity</b>	72 in Dia. x 30 in
<b>Media Charge Capacity (Steel)</b>	3,000 lb
<b>Table Blaster Height, Cabinet Only</b>	168 in
<b>Table Blaster Width, Cabinet Only</b>	124 in
<b>Table Blaster Depth, Cabinet Only</b>	108 in
<b>Dust Collector Height</b>	173 in
<b>Dust Collector Width</b>	52 in
<b>Dust Collector Depth</b>	64 in
<b>Direct-Drive Blast Wheel</b>	(1) 20 hp
<b>Direct-Drive Blast Wheel - Optional Wheels</b>	(2) 10 hp (2) 15 hp

**Ventilation Requirement** 3,000 CFM

**Electrical Requirement - Current (Table Blaster Only)** 27.3 A

**Electrical Requirement - Current (with Dust Collector)** 36.3 A

**Electrical Requirement - Voltage** 460 V

**Electrical Requirement - Frequency** 60 Hz

**Electrical Requirement - Phase** 3

## Capabilities

### Features

- Solid construction
- Safety Interlock
- 20 HP direct drive blast wheel
- 84" x 36" Optimal Blast Area
- 6000 # Table Capacity
- Ease of operation
- Low noise level
- Low initial investment
- Superior parts cleaning
- Air wash separator
- Overhead loading
- Digital cycle timer

### Blast Cleaning Solutions for:

- Ferrous and non-ferrous castings
- Heat treated parts
- Automotive parts
- Die Castings
- Deflashing plastic
- Descaling
- Peening
- Deburring

### Available Options

- Variable speed motors
- Rotary Screen
- Dust collector
